Document structure

\part{title} \subsubsection{title} \chapter{title} \paragraph{title} \section{title} \subparagraph{title}

\subsection{title}

Use \setcounter{secnumdepth} $\{x\}$ suppresses heading numbers of depth > x, where chapter has depth 0. Use a *, as in \section*{title}, to not number a particular item—these items will also not appear in the table of contents.

Text environments

\begin{comment} Comment (not printed). Requires verbatim

package.

\begin{auote} Indented quotation block.

\begin{quotation} Like quote with indented paragraphs.

\begin{verse} Quotation block for verse.

intem[x] textUse x instead of normal bullet or number. Required for descriptions.

References

\label{marker} Set a marker for cross-reference, often of the

form \label{sec:item}.

Give section/body number of marker. \ref{marker}

\pageref{marker} Give page number of marker. \footnote{text} Print footnote at bottom of page.

Floating bodies

\begin{table}[place] Add numbered table. \begin{figure}[place] Add numbered figure. \begin{equation} [place] Add numbered equation. \caption{text} Caption for the body.

The place is a list valid placements for the body. t=top, h=here, b=bottom, p=separate page, !=place even if ugly. Captions and label markers should be within the environment.
